SUMMARY

- Experienced in trajectory design, orbital mechanics, numerical methods, and autonomous GN&C
- Seven-time returning NASA intern / visiting technologist
- Astrodynamics PhD candidate at Purdue (M.S./PhD): Multi-Body Dynamics Research Group
- Technical communication and project leadership skills

DISTINCTIONS

NASA Space Technology Research Fellowship (NSTRF/NSTGRO)

Aug. 2019 - Present

For "graduate students who show significant potential to contribute to NASA's goal of creating innovative new space technologies"

NASA Pathways Intern Award Fall 2018

Awarded for outstanding work at NASA Johnson Space Center on lidar retroreflector identification and pattern generation for Orion

PROGRAMMING

Python	Expert
Matlab	Advanced
Java	Advanced
C++	Intermediate
Julia	Intermediate

EDUCATION

PhD - Aeronautics & Astronautics Engineering Purdue University

Exp. May 2023
West Lafayette, IN

- Advisor: Prof. Kathleen Howell, GPA: 4.0/4.0.
- Dissertation: "Reinforcement Learning Approaches for Autonomous Guidance and Control in a Low-Thrust, Multi-Body Dynamical Environment"

M.S. - Aeronautics & Astronautics Engineering Purdue University

May 2020
West Lafayette, IN

- Advisor: Prof. Kathleen Howell, GPA: 3.74/4.0 Thesis: "Autonomous Guidance for Multi-Body Orbit Transfers using Reinforcement Learning"

B.A. - Mathematics (Computational) and Japanese University of Colorado Boulder

Aug. 2014
Boulder, CO

- Minor in computer science, academic year (2011-12) in Osaka, Japan, GPA: 3.56/4.0

ASTRONAUTICAL ENGINEERING EXPERIENCE

Completed 7 work experiences across three NASA centers (10-17 weeks each)

Graduate Pathways Intern NASA Johnson Space Center

Aug. 2018 - Present
Houston, TX

3x returning: GN&C Autonomous Flight Systems Branch (EG6)

Classified as "on leave" outside 3 tours:

- Collaborated with flight software team in investigating anomalous **trajectory targeting** behavior for Orion Summer 2021
- Implemented prototype **flight software** supporting Orion state estimation, integrated module into docking simulation Summer 2019
- Built retroreflector pattern **optimization** library in Julia and devised a novel reflector ID algorithm: now a baseline component for Orion's onboard **relative navigation** suite Fall 2018

Visiting Technologist (NSTRF/NSTGRO) NASA Goddard Space Flight Center

May 2020 - Aug. 2022
Greenbelt, MD

3x returning: Navigation and Mission Design Branch (Code 595)

- Applied research to NRHO **low-thrust maneuver planning** based on the conceptual NRHO segment of Lunar IceCube Summer 2022
- Spearheaded investigation into autonomous low-thrust maneuver planning for multi-body orbit **stationkeeping** Winter 2021
- Led research investigation into neural network efficacy for autonomous **cislunar G&C** given operational constraints Summer 2020

Mission Design & Navigation Intern (392C) NASA Jet Propulsion Laboratory (JPL)

May 2017 - Jul. 2017
Pasadena, CA

- Developed prototype for an interactive **multi-body trajectory design** tool in **Monte** (`monte.poincare`) to connect orbits in three-body systems
- Formulated an automated method for **libration point orbit transfers** using high-dimensional tree structures with Poincaré maps

TECHNICAL SKILLS

Software Engineering

- Version control (git)
- Unit testing
- Object-oriented architecture
- Agile development

Numerical Computing

- High-performance simulation
- Distributed computing

Communication

- LaTeX (expert)
- Technical writing
- Public speaking/presenting

Tools & Platforms

- Unix systems (Linux & macOS)
- Android app development

Licensed Private Pilot

- Airplane single engine land (2018)

ACADEMIC ACTIVITIES

Journal Peer Reviewer

Acta Astronautica (2020), Journal of Spacecraft and Rockets (2022)

Conference Session Chair

2022 AIAA SciTech Forum. *AI and Machine Learning for Astrodynamics*

CAMPUS INVOLVEMENT

Graduate Teaching Assistant Spring 2019

Managed virtual lab development with the Purdue innovation center.

Grader (Graduate Aerospace) Fall 2017, Spring 2018

Graded homework for orbital mechanics & attitude dynamics

FOREIGN LANGUAGE

English	Native
Japanese	Proficient
Spanish	Beginner
Latvian	Basic

SOFTWARE ENGINEERING EXPERIENCE

Founder / Software Engineer TookTech LLC

Sep. 2015 - Jul. 2017
Boulder, CO

- Led Android app development for OpenSnow meteorologist team, helping client surpass **20,000 active** Android users
- Supported client business growth via **creative custom software** solutions within an allocated budget

Software Engineer Amadeus Consulting

Nov. 2014 - Feb. 2016
Boulder, CO

- Built custom software for **numerous stakeholders** in Java and Python
- Engineered **data analytics** tools for Google, supporting cloud computing, web scraping, and API management
- Participated in **agile software development** cycles with git version control, object-oriented architecture, unit testing, and continuous integration

GRADUATE RESEARCH EXPERIENCE

- Researching novel onboard guidance and control techniques for low-thrust spacecraft under **multi-body dynamics** via machine learning
- Providing regular feedback on **advanced trajectory design** techniques to the Multi-Body Dynamics Research Group at Purdue
- Implemented research on MIT's **high-performance computing** cluster with efficient C++/Python interfacing

PROJECT MANAGEMENT EXPERIENCE

- **Managed inter-university project** for three years between Purdue and the ARCLab at MIT (2017-2020)
- Leading a **10-person team** and overseeing development of Purdue-led open-source software: forest (fast orbital environment simulation toolkit)

JOURNAL AND CONFERENCE PUBLICATIONS

- **LaFarge, N. B.**, Miller, D., Howell, K. C., & Linares, R., "Autonomous Closed-Loop Guidance using Reinforcement Learning in a Low-Thrust, Multi-Body Dynamical Environment". *Acta Astronautica*, vol. 186, 2021
- **LaFarge, N. B.**, Howell, K. C., and Folta, D. C., "Adaptive Closed-Loop Maneuver Planning for Low-Thrust Spacecraft using Reinforcement Learning", *International Astronautical Congress*, Paris, France, 2022
 - **Paper pre-selected for *Acta Astronautica* peer review.** (*in progress*)
